## ABOUT ME

Senior full stack developer with 10+ years in web development and technical leadership. Most of my career has been at SEBPO, where I progressed from developer to team lead, delivering eCommerce platforms and business websites for international clients. I work across PHP, Node.js, TypeScript, React, Next.js, NestJS, and AWS, and I'm currently preparing for my PMP certification. I also use AI coding tools like Claude Code and Codex — including custom MCP servers, Claude Skills, and hooks — to build and ship faster without cutting corners on quality.

## CORE SKILLS

|                                          |                                                                                                                                        |
|------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Tech Stack                               | PHP, Node.js, Express.js, TypeScript, React, Next.js, NestJS, WordPress, WooCommerce, MySQL, PostgreSQL, MongoDB, TypeORM              |
| AI-Assisted Development                  | Claude Code & Codex (agentic coding), MCP (Model Context Protocol) integration, Claude Skills integration, hooks & workflow automation |
| Cloud & DevOps                           | AWS (Lambda, S3, CloudFront), Docker, CI/CD, Git, hosting & server management                                                          |
| Leadership & Coordination                | Team & task coordination, vendor communication, stakeholder communication, system architecture & design                                |
| Project Management & Collaboration Tools | Jira, Asana, Trello, Slack, Zoom, Time Doctor, Google Docs / Sheets, Microsoft Excel, Microsoft Word                                   |

## PROFESSIONAL EXPERIENCE

Senior Software Engineer · SEBPO  
Present

Sep 2015 –

- Manage and coordinate development teams day to day — task assignment, sprint planning, and keeping delivery on track across multiple projects
- Design system architecture and database schemas for eCommerce and business web platforms built on PHP, Node.js, and WordPress
- Work directly with international clients to gather requirements, set expectations, and keep communication clear throughout delivery
- Handle vendor relationships and third-party integrations — payment gateways, APIs, automation tools
- Run regular code reviews, identify bottlenecks, and push performance improvements across the team's output

## Frontend Developer · Compare Club (Remote — Sydney, Australia)

Jul 2021 – Jul

2022

- Worked on WordPress-based platforms — built custom plugins, themes, WooCommerce features, and ACF integrations
- Used AWS Lambda for serverless functions and S3 + CloudFront for static content delivery on a high-traffic financial platform
- Set up CI/CD pipelines with Lambda automation to make deployments faster and less manual
- Turned Figma/UI designs into fast, accessible web pages — ran Lighthouse audits and fixed what was slowing things down
- Helped maintain YourLifeChoices, one of Australia's larger lifestyle platforms, during high-traffic periods

## Software Engineer · Dropndot Solutions

Apr 2014 – Aug

2015

- Built websites and web apps for small businesses — this is where I got solid in PHP, JavaScript, HTML, and CSS
- Worked closely with clients from brief to delivery — handled requirements, timelines, and handoffs

## EDUCATION

---

### Bachelor of Engineering (BE) — Computer Science

Dec 2009 – Dec

2012

*International Islamic University Chittagong*

## CERTIFICATIONS

---

- PMP Exam Preparation — 35 Contact Hours (In Progress)
- AWS Fundamentals
- MongoDB Certifications
- DataCamp Python Courses

## SELECTED PROJECTS

---

### Personal Projects

- Subscription Tracker — Next.js/Prisma/PostgreSQL SaaS-style app, built with Claude Code as a live example of agentic AI-assisted development — [github.com/mohsin86/subscription-management](https://github.com/mohsin86/subscription-management)
- Auto Garage Services — full-stack, role-based garage operations platform (Next.js, NestJS, PostgreSQL) — [github.com/mohsin86/auto-garage-services](https://github.com/mohsin86/auto-garage-services)

### Client Work (SEBPO)

- HTML5 Animated Banner Development — configurable, timeline-based animated banner system (HTML5, JavaScript, GSAP)
- Your Life Choices — frontend & backend, plugins, API integration, forum optimization (PHP, JavaScript, AWS)
- Al Musaidah Foundation — non-profit organization website (WordPress, PHP, Bootstrap)
- Star Plus Home Care — home health care provider website (WordPress, PHP, Bootstrap)
- Product Scrapper — retailer price/stock scraping dashboard (Node.js, Express.js, Puppeteer)
